EDUCATION

University of Pennsylvania

Master of Applied Economics and Data Science

Philadelphia, US

Aug. 2026 – Nov. 2027 (Expected)

University of Cambridge

BA in Economics GPA: 3.8/4.0

Cambridge, UK

Sep. 2023 – Jun. 2026

Relevant Coursework: Microeconomics, Macroeconomics, Econometrics, Mathematics and Statistics for Economists, Finance

PROFESSIONAL EXPERIENCE

InnovaAI Tech

Quantitative Risk Analyst Intern

San Francisco, US

Jul. 2026 – Present

- Built an end-to-end market risk management framework in Python for the firm's internal multi-asset investment portfolio, integrating equities, bonds, and commodities with macro-factor extensions to quantify portfolio risk exposure and sensitivity
- Implemented and backtested multiple VaR models (historical simulation, parametric, Monte Carlo, and EWMA-t enhancement), where the enhanced model reduced backtesting exceptions from 15 to 3 (99% level) and improved conditional coverage p-value from 0.01 to 0.42, supporting more reliable daily market risk monitoring
- Conducted stress testing and scenario analysis under major historical and hypothetical market shocks (e.g., 2008 Crisis, COVID-19), assessing portfolio resilience and tail risk concentration
- Recommended risk-based hedging and rebalancing strategies that reduced the portfolio's 99% one-day VaR by 20% and improved out-of-sample Sharpe ratio, demonstrating the application of quantitative risk metrics in portfolio optimization and limit management

Morgan Stanley Private Equity Asia

Off-cycle Intern, Channel Sales Department

Shenzhen, CN

Aug. 2025 – Sep. 2025

- Streamlined due diligence by testing an automated web-scraper to extract administrative penalties from regulatory websites, manually reviewing outputs to validate system-assigned severity rankings, and escalating 10+ compliance issues to the internal system
- Supported operational risk mitigation during critical distribution system outages by coordinating directly with IT teams to diagnose failures, fully restore business processes within 4 hours, and minimize service disruptions
- Analyzed capital flows and sales metrics across institutional channels to evaluate distributor performance, producing quantitative analysis that advised exclusive premium fund quotas allocation to top-tier distributors
- Monitored macroeconomic developments and market conditions, articulating their potential impact on firm's competitive edge and portfolio positioning, presenting these insights to 50+ representatives across 10+ distributors in bi-weekly alignment sessions and senior management at weekly firm-wide briefings

PICC Hong Kong Asset Management

Equity Investment Research Assistant

Hong Kong, CN

Aug. 2024 – Sep. 2024

- Conducted fundamental equity research on companies across the Hong Kong, China and US markets by analyzing financial statements, industry trends and macroeconomic developments to assess financial performance, downside risks and investment outlook
- Produced weekly market reports covering macro events (e.g., Fed decisions) and economic data releases (e.g., unemployment rate), and presented portfolio implications to senior management to support investment decision making
- Researched 2025 stock market outlook and collected broker insights on sector developments, trading flows and market sentiment to identify emerging market risks and investment opportunities
- Built a Python-based equity screening model to rank companies based on their financial ratios and risk-adjusted performance metrics including Sharpe Ratio and volatility to support comparative analysis and investment screening

Thalesians

Research Assistant

London, UK

Jul. 2024 – Aug. 2024

- Enhanced quantitative trading models (e.g., MarQCus) by incorporating qualitative drivers such as geopolitical events and economic fundamentals into quantitative risk indicators, raising portfolio Sharpe Ratio by 1%
- Developed and benchmarked analytical frameworks across Java, Python, C++, and SQL to compare computational performance and implementation efficiency, supporting quantitative model development

Costone Asset Management

Investment Research Assistant, Hardware Technology Group

Shenzhen, CN

Jul. 2023 – Sep. 2023

- Executed in-depth qualitative analysis on 10+ hardware technology companies via on-site surveys and CEO interviews, cross-verifying operational metrics to uncover potential investment blind spots
- Assessed competitive dynamics within China's VR glasses market, and successfully advised management to veto a planned investment

SELECTED PROJECTS

Private Quantitative Investment Society

May 2025 – Present

- Co-founded a multi-asset quantitative fund managing RMB 4 million AUM across fixed income, FX, and equities, achieving a 12% annualized return through Fama-French multi-factor models and strategic allocations
- Led risk management and FX trading strategies, engineering robust control frameworks that successfully capped portfolio risk variance fluctuations within $\pm 50\%$ despite severe recent market volatility

SKILLS & INTERESTS

Technical Skills: Python, Java, SQL, Stata, EViews, Certified AI trainer

Risk & Quantitative: VaR, Stress Testing, Monte Carlo Simulation, Portfolio Risk Analytics, Factor Modeling
